

ILLiad Configuration for Accessing the IDS Availability Server

1. Mark sure your ILLiad system has been upgraded to version 7.1.8 or higher.
2. Open port 2100 for IP 137.238.1.47 on your firewall
3. Open Customization Manager and click on Z39.50 Setup.
4. Click on the Server Configuration Tab then select New/OTHER from the menu.
5. Enter the following information then click Save:
 - a. Name: IDS Availability Server for eSerials
 - b. Server Type: OTHER
 - c. Server Address: 137.238.1.47
 - d. Port: 2100
 - e. Title Search: @attr 1=4 "<#Title>"
 - f. ISSN Search: @attr 1=8 "<#ISSN>"
 - g. Type: MARC
 - h. Identifier: 845
 - i. Location: \$b
 - j. Availability: \$a
 - k. Availability Type: Value
6. Once you have saved the settings, close out of Customization Manager.
7. You now have access to the IDS Availability Server.
